Do You Read Labels?

Domestic science teachers and food authorities are urging the housewife to carefully read the labels on all food articles.

The laws of most States compel food manufacturers to print the ingredients of their products on the label, and this enables consumers to distinguish healthful foods from those which may be deleterious.

High-grade baking powders are made of pure cream of tartar, derived from grapes. Royal Baking Powder is a type of the highest grade. It is healthful beyond a doubt and the safest and best to use.

The low-grade baking powders are made from alum, a mineral acid salt, or phosphate of lime.

Consumers can learn the character of the baking powder by referring to the label, which must state whether the contents include cream of tartar, alum or, phosphate.

December 16th you will miss what is indeed the opportunity of a life-time. To travel to these Expositions while remaining at home may seem contradictory. Yet that is exactly the privilege that local amusement patrons may enjoy via Lyman H. Howe's Travel Festival. Recognizing that a comparatively small percentage of the nation's citizens could find the opportunity to make the long journey to the Pacific Coast Exposition, Mr. Howe's labeled the opportunity to make the long journey to the Pacific Coast Exposition, Mr. Howe's labeled the opportunity to make the long journey to the Pacific Coast Exposition, Mr. opportunity to make the long journey to the Pacific Coast Exposition, Mr. Howe is bringing them here, so that everyone will have the pleasure of

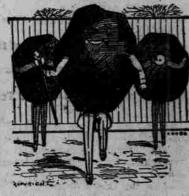

Common Pleas Court.
Herbert McNicholas, committed to
Mansfield Reformatory on burglary

and fatigue brought on by tramping all day and day after day. Visions of new and supreme beauty and wonderment are unfolded by Mr. Howe's films that are beyond the dreams of the most vivid imagination. For these Expositions are truly on a scale of magnificence befitting the tremendous achievement they celebrate.

The vast courtyards around which colonades sweep to the right and left, triumphal arches of heroic size and trowned by great symbolical groups and the vast domes and pinnacles of the Panama-Pacific Exposition at San Francisco are portrayed superbly in a feature that was filmed by his own camera men exclusively for this exhibition. But the feature as presented by Howe comprises much more than the entrancing beauty of the San Francisco Exposition for it also includes comprehensive scenes of the Exposition in San Diego with its wealth of architecture, as well as a trip through the Panama Canal from ocean to ocean. The San Diego Exposition is a grouping of buildings of the Cathedrals of Spain and the quaintness of the old missions.
